RECOMMENDED LIFESTYLE PRACTICES							
AGE	18+	30	40	50	60	70	80+
Alcohol and drugs	Don't drive after drinking or using drugs. If drinking or using drugs is causing problems for you or someone you know, we can help.						
Diet and nutrition	Enjoy a variety of healthy foods daily. Eat 5 or more servings of fruits and vegetables every day. Choose lean meats, low-fat dairy products, and whole grain foods. Limit foods high in salt, saturated and trans fat, and sugar. Women of childbearing age should take a multivitamin with 0.4 mg of folic acid daily. To prevent osteoporosis, talk to your doctor about calcium and vitamin D supplements.						
Emotional health	Talk to your personal physician or other medical professional to get help if you're depressed, anxious, thinking of suicide, or being threatened, abused, or hurt by someone.						
Exercise	Be physically active for a minimum of 30 minutes daily. Walk the dog, dance, and take the stairs—it all counts!						
Injury prevention	Wear your seat belt every time and buckle up children. Don't keep loaded firearms in the house. Wear a helmet when you are on a bike, motorcycle, skateboard, or skate.						
Midlife choices (for women)	Starting at age 45, talk to your personal physician about options for managing menopausal symptoms and preventing serious medical conditions later in life.						
Sexual practices	Practice safer sex by using condoms to avoid sexually transmitted diseases. Some medications and chemicals in the home or in the workplace can be harmful if you or your partner become pregnant. Plan all pregnancies to reduce risk. Talk to your medical professional about effective birth control (including emergency contraception) if you do not want to become pregnant now.						
Skin protection	Always protect your skin from the sun when outdoors. Wear a hat and sunscreen to reduce your risk of skin cancer.						
Smoking	Don't smoke or use tobacco. If you do, we can help you quit. Don't allow anyone to smoke around you or your child.

The doctor is always in.

Manage your health online with kp.org/mydoctor.

Your doctor's home page is your one-stop shop for time-saving resources. Use it 24 hours a day, 7 days a week to:

- E-mail your doctor's office with routine messages.
- View most lab results—many available on the same day.
- Refill prescriptions and have them mailed to your home.
- Request, cancel, or review routine appointments.
- Access online programs to help you prepare for surgery, manage headaches, or make healthy changes.
- Read doctor-recommended health information.

If you don't yet have an active password, just go to kp.org/register. We'll ask you a few questions to verify your identity. Once registered, you can sign on to access all the secure features of kp.org/mydoctor with your unique user ID and password.

Find more tools online:

- **Get exactly what you want.** Try these shortcuts to learn about the services we offer or the issues you care about:
 - emotional health – kp.org/mindbody
 - fitness – kp.org/fitness
 - nutrition – kp.org/nutrition
 - quitting smoking – kp.org/quitsmoking
 - weight management – kp.org/weight and kp.org/maintainweight

Find all of these and more in the Featured Health Topics section at kp.org/healthyliving.

- **Listen and learn.** Listen to Healthy Living To Gosm Podcasts from Kaiser Permanente by logging on to your physician's home page at kp.org/mydoctor or go to kp.org/listen.

Also, your **Kaiser Permanente Healthwise® Handbook** is full of self-care advice. Need a copy? Purchase one from your local Health Education Center for \$5.

RECOMMENDED SCREENINGS AND IMMUNIZATIONS							
AGE	18+	30	40	50	60	70	80+
Breast cancer (for women)	Have a mammogram every 1 to 2 years.						
Cervical cancer (for women)	Have a Pap test every 3 years starting at age 21, or earlier if sexually active. Beginning at age 30, have a Pap and HPV test every 3 years up to age 65.						
Cholesterol	Cholesterol should be checked every 5 years, more often if its level is higher than normal.						
Colorectal cancer	Have a fecal immunochemical test (FIT) once a year and/or a flexible sigmoidoscopy every 5 years.						
Diabetes	For adults over 45 years of age, get tested every 5 years.						
HIV and other STDs	Get tested for HIV and other STDs if you have had unprotected sex, are pregnant, or have any other reason to think you may be at risk. Have a yearly chlamydia test if you're sexually active and between ages 14 and 25.						
Hypertension	Have your blood pressure checked every 1 to 2 years. An ideal blood pressure is less than 120/80.						
Immunizations	Get a tetanus diphtheria booster shot every 10 years. Get an annual flu shot starting at age 50. Get a pneumonia shot once after age 65.						
Osteoporosis	Talk to your physician about having a bone mineral density (BMD) test at age 65.						
Overweight and obesity	Have your body mass index (BMI) calculated every 1 to 2 years.						
Prostate cancer (for men)	Discuss the prostate-specific antigen (PSA) test and rectal exam with your physician.						

Please note: These recommendations are for generally healthy people. If you have an ongoing health problem, special health needs or risks, or if certain conditions run in your family, your prevention plan may be different.
