Treatment for Perianal or Penile rash

1. After each urination or bowel movement, wipe with wet cotton washcloth soaked with Cetaphil soapless cleanser.
2. Apply Zinc Oxide paste in a thick layer to sore area. (This is found in over the counter Diaper rash cream, pick the brand with the highest percentage of Zinc Oxide listed under ingredients.)
3. Apply medicated cream as recommended by your provider and then a layer of Zinc Oxide paste.
